Specialised analytical expertise and innovative solutions to empower decision making

Based in New Zealand, with a global reach, Harmonic brings a fresh and ground-breaking approach to problem solving. We provide world class decision support tools and smart analytics to address your distinct cost and productivity drivers.

Our tailored models and software solutions are proven to deliver tangible and lasting value. We help our clients to optimise their operational and expenditure programmes and improve return on investment, typically saving tens of millions of dollars, per annum.

Our people are distinguished by their deep analytical capability and technical expertise combined with hands on commercial experience. We work across all functions of a business including executive, IT, finance and operations.

We are proud of our track record of delivering significant on-going client value. We strive to make a difference and work closely with each client. We are committed to providing excellent customer service and measurable, long term benefits.

It's simply better together.

"Harmonic's real strength is their problem solving capability and the right combination of expertise and flexibility to create innovative solutions tailored to our needs. Harmonic always delivers to the expected outcome, on time and they have become a trusted independent partner." **Telecom NZ**

Collaborate ➤ Deep Insight ➤ Innovate ➤ Results

Our expertise

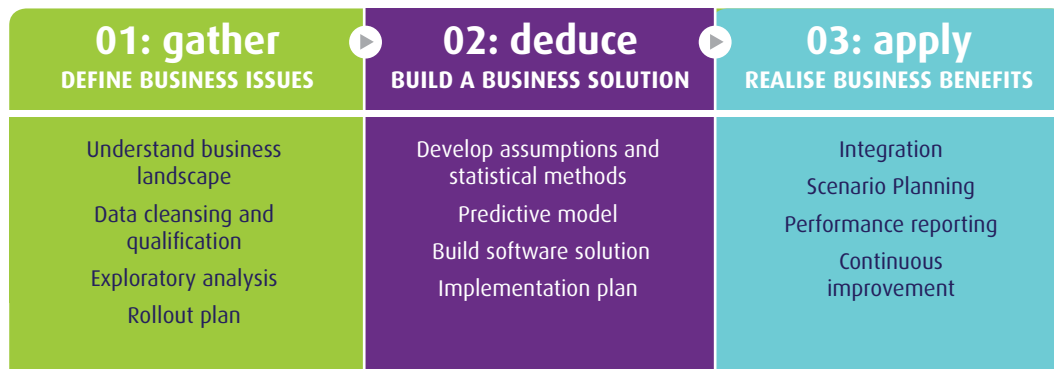

Harmonic works across multiple sectors, with particular experience in asset intensive industries such as energy, utilities, telecommunications and agriculture.

Our clients are often data rich and information poor. We help turn organisational data into an asset. A deep understanding of business and technical issues combined with our proven data analysis, integration and forecasting capabilities enables decision makers to harness information for improved business performance.

Our accomplished team of operations researchers, statisticians, engineers, and business managers are experts in their field. We collaborate with universities and partners to complement our diverse in-house expertise, when required.

Benefits delivered:

- Informed decision making – actionable insight from reliable data
- Pro-active long term planning
- Improved service performance
- Reduced operating costs
- Asset efficiency
- Manage and mitigate asset failure risk
- Optimise resources and improve efficiency gains
- Time saving – ease of automated information
- The flexibility to phase investment without compromising service

BUSINESS BENEFITS: WORLD CLASS DECISION SUPPORT COST SAVINGS ASSET EFFICIENCY
